**Exam Code:**HPE6-A42

**Exam Name:**Implementing Aruba WLAN (IAW) 8

**Version:**Demo

### QUESTION 1

What does an Aruba Mobility Master (MM) do before it deploys a configuration to a Mobility Controller (MC)?

- A. It encrypts the configuration to be deployed and backs it up to a secure archive.
- B. It obtains the current configuration, encrypts it, and backs it up to a secure archive.
- C. It synchronizes the configuration with templates on Aruba AirWave.
- D. It removes any commands that are not supported on that MC or have dependency errors.

Correct Answer: C

---

### QUESTION 2

What is one difference between how a network administrator can monitor clients in the Mobility (MM) interface and in the AirWave Management Platform?

- A. AirWave shows trends for the past several minutes, while MM shows longer trends.
- B. AirWave combines information from more sources, such as RADIUS authenticating servers and APs.
- C. AirWave shows the current signal level for the client connection, while MM does not show RF statistics.
- D. MM shows user and role information associated with clients, while AirWave does not.

Correct Answer: B

---

### QUESTION 3

A WLAN in an Aruba Mobility Master (MM)-based solution enforces Enterprise-WPA2 security and uses the tunnel forwarding mode. The company has an external RADIUS server.

Which device exchanges RADIUS packets with the RADIUS server?

- A. Mobility Controller (MC)
- B. wireless client
- C. access point (AP)
- D. Mobility Master (MM)

Correct Answer: D

---

### QUESTION 4

What is a requirement for the Dashboard > Traffic Analysis window on the Aruba Mobility Master (MM) to show data?

- A. Airmatch and ClientMatch must be enabled.
- B. The solution must have active PEFNG licenses.
- C. Firewall policies must include application filtering rules.
- D. WLANs must use the decrypt-tunnel forwarding option.

Correct Answer: B

---

#### **QUESTION 5**

Refer to the exhibits. Exhibit 1 Exhibit 2

**AAA Profile: Exam\_Employees**

AAA Profile:

Initial role:

MAC Authentication Default Role:

802.1X Authentication Default Role:

Download Role from CPPM:

Set username from dhcp option 12:

L2 Authentication Fail Through:

Multiple Server Accounting:

User Idle timeout:  seconds

Max IPv4 for Wireless user:

RADIUS Interim Accounting:

Clients(1) <span style="float: right;">Default Columns ▾ ▲</span>								
Client	Health(%)	IP Address	Bond	Radio PHY	Client PHY	Device	Role	Forward Mode
employee	48	10.1.51.150	2.4 GHz	HT 2D MHz	HT 2D MHz	Unknown	guest	Tunnel

An Aruba solution supports a WLAN that uses WPA2-Enterprise security. Exhibit 1 shows the AAA policy for the WLAN.

Users are supposed to be assigned to different roles after authentication. Network administrators test a connection with the employee user account. Exhibit 2 shows the status for the client after this test.

What is a possible reason for the issue shown in Exhibit 2?

- A. The shared key configured for the ClearPass server is incorrect.
- B. The RADIUS server is not correctly set up to send a user role for the employee account.
- C. MAC authentication is enabled on the WLAN, and the test device does not have an authorized address.
- D. The administrators entered the wrong password for the employee account.

Correct Answer: B

---

#### **QUESTION 6**

Which settings can a Mobility Master (MM) deploy to Mobility Controllers (MCs) but master controllers CANNOT deploy to local controllers?

- A. radio profiles
- B. AAA profiles
- C. VLAN settings
- D. WLAN settings

Correct Answer: A

---

#### **QUESTION 7**

A company plans to deploy a Mobility Master (MM). The MM will manage 50 Mobility Controller (MC) appliances that will control a total of 680 APs, and 10 Virtual Mobility Controllers (VMCs) that will control a total of 160 APs.

How many MM licenses does the company require?

- A. 60
- B. 210
- C. 900
- D. 960

Correct Answer: C

Starting with ArubaOS 8.0.1, the MM license is required to terminate devices (controllers or APs) on Mobility Master. If the Mobility Master does not have sufficient MM licenses and an AP fails to obtain a license, that AP can get an IP address and connect to its controller, but will not broadcast an SSID.

---

### QUESTION 8

Which pre-defined role allows DHCP, DNS, and internal captive portal redirection for a guest WLAN?

- A. exam\_guest-guest-logon
- B. authorized
- C. guest-logon
- D. guest

Correct Answer: C

---

### QUESTION 9

A network administrator configures an Aruba Mobility Master (MM)-based solution to provide wireless access to employees. The solution must meet these criteria:

Authenticate users to a network RADIUS server

Enforce different Aruba firewall rules based on the user department

How can the administrator meet these criteria in the simplest way?

- A. Have the RADIUS server assign users in different departments to different VLANs. Apply firewall policies based on IP ranges.
- B. Have the RADIUS server send different roles for users in different departments. Apply role-based firewall policies.
- C. Create multiple zones on the MM. Assign different departments and sets of firewall policies to different zones.
- D. Create a different WLAN and SSID for each department. Apply different firewall policies to each WLAN.

Correct Answer: B

---

### QUESTION 10

An Aruba solution runs ArubaOS 8 and uses a standalone controller architecture. Which feature can administrators use to optimize the channel and power plan for the APs?

- A. ARM
- B. Rule Based Client Match
- C. AirMatch
- D. AppRF

Correct Answer: A

---

**QUESTION 11**

What is required for a WLAN that uses WPA2-Enterprise security?

- A. a Web server to host a login portal
- B. a shared password to secure access to the WLAN
- C. RADIUS server or servers
- D. a policy to allow unauthenticated users to receive RADIUS

Correct Answer: C

---

**QUESTION 12**

A company plans to deploy a Mobility Master (MM) solution with two MM nodes. The MM solution will manage 20 Mobility Controller (MC) appliances that will control a total of 800 APs.

How should the network administrator install the AP licenses?

- A. 40 AP licenses on the MM
- B. 400 AP licenses on the MM
- C. 800 AP licenses on each MC
- D. 800 AP licenses on the MM and 40 AP licenses on each MC

Correct Answer: A
